

## Product focus: PRO Series B2 Chassis

ZEBRONICS® recently launched their own premium brand in the country which goes by the name of 'PRO Series'. Today we take a closer look at one of their flagship chassis called the B2.

As per ZEBRONICS®, the B2 chassis is a revolutionary design inspired from a stealth bomber plane. Just as the bomber plane is powered by 2 engines, this chassis also supports 2 power supplies(SMPS). The chassis comes in piano black glossy finish, with an option of a transparent side panel with 120 mm LED fan. The unique quality of this chassis is, that the user does not require any third party apparatus to connect the two power supplies to the system, has all accessories which are needed to run two power supplies at the same time.

This chassis is ideally suited for high end gamers, who are a little budget conscious while going for high end power supplies. As technology progresses, games are becoming tougher to run on budget hardware, where high end graphic cards come into play. And all higher end graphic cards require lots of power from the power supply to be able to run properly. With B2, customers have a choice of using 2 mid range power supplies together, one to power the system and one to power the graphics card. Which saves a huge cost, without compromising on the systems overall performance. Not only that, there are specially designed heat exhausts for both the power supplies for efficient cooling.

- Other features of the chassis include
- Option for front 120mm intake fan
- Option for rear 120mm exhaust fan
- Illuminated power button
- Top USB, FireWire and Audio
- Full ATX mother compatibility
- Complete Screwless design
- Space for 3 Optical disk drives and 3 Hard Disk Drives and one Floppy drive.

### About Top Notch Infotronix;

**TopNotch**; established;1997 is , Head Quartered in; Chennai and has 18 Branch offices & 26+ service centers covering major cities and over a 1100 distributors, covering the entire country. Over the years our brand "**ZEBRONICS®**" has grown into the leading & most trusted brand names in Computer Hardware & Peripherals.

With the Largest Range of Computer Chassis, Power Supplies, Graphics Cards and a vast range of Headphones & audio accessories, Web/Digital cameras, TV Tuners, Human Interface Devices, LEADTEK Quadro cards, BIOSTAR Motherboards, Cooler Master Range, BENQ range of peripherals and recently added ] PRO Series range, we have come a long way from being just another computer peripheral brand.
