

GO PRO Professional computing gear

PRO Series simply put stands for professional computing gear, focused on the premium product users who want a little extra on the reliability and quality part, good looks are an added advantage. PRO Series products were designed with their own unique abilities and specific functions. A great deal of time and effort has been invested in PRO Series by the research & development and the marketing team to bring out unconventional, specialized and professional products. Its the 1st time an Indian company has gone beyond the stereotype Indian IT hardware standards.

PRO series was conceptualized after about 2 years of market research and studying different aspects of technology and how it is going to grow so that when you 'Go PRO' your investment is worth it. In this time every product was subjected to multiple rigorous tests. Each of the PRO Series products will amaze you and entice you to go for it, however we suggest discretion and advise you to make an informed decision however tempting the products may seem.

Why PRO Series -

Over the years, the Indian market has evolved. The products in the market however had not, though some additions and improvements were done, but not enough that go beyond the high expectations of the 'Indian Techie'. PRO Series on the other hand is designed to fill this void. Exceptionally well designed products, yet value for your money.

Essentially PRO series products deliver more than their cost. The chassis for example are designed in a way which makes them outstanding in looks, usability and efficiency. The functionality however is more so inspired from fighter jets. Just like Jets; dual engines, superb construction and pinpoint precision, the PRO Series excels in deliverance with Dual Power Supply setups, superior internal construction and flawless design. This is what the 'Indian Techie' expects and PRO Series delivers nothing less.
